

PREREQUISITES

TEAM ID : PNT2022TMID18899

PROJECT NAME : IoT based smart crop protection system for
Agriculture

SOFTWARE

The image displays two screenshots of a Python 3.11.0 shell window. The top screenshot shows the prompt 'Python 3.11.0 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32' followed by the command '>>> print("Hello world")' and the output 'Hello world'. The bottom screenshot shows the same prompt and command, but the output 'Hello world' is not visible, suggesting the window was scrolled or the output was not captured. Both screenshots show a Windows taskbar at the bottom with various icons and a search bar.

```
Python 3.11.0 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> print("Hello world")
Hello world
>>>
```
